PROFESSIONAL SUMMARY

Informatics undergraduate with a Computer and Network Engineering background and hands-on IT internship experience at Kominfo DIY. Focused on software development, backend systems, REST API development, and AI integration, with projects using TypeScript, Python, Rust, and the Google Gemini API. Holds MikroTik Certified Network Associate (MTCNA), Google Cybersecurity, and Google AI Essentials credentials. Interested in building secure, maintainable software and practical AI-enabled applications.

PROFESSIONAL EXPERIENCE

IT Support & Network Monitoring Intern

Dinas Komunikasi dan Informatika DIY (Kominfo DIY)

Yogyakarta, Indonesia | 01 Jul 2025 – 17 Oct 2025

- Monitored network availability, bandwidth utilization, and device status across government offices and public school facilities using MikroTik The Dude and PRTG Network Monitor.
- Assisted with network troubleshooting, system maintenance, and technical documentation to support IT operations.
- Supported infrastructure activities involving access points, switches, and CCTV-related installations.
- Documented IT equipment and network infrastructure to support operational records and reporting.

EDUCATION

Bachelor's Degree in Informatics (S.Kom.)

Universitas AMIKOM Yogyakarta

Yogyakarta, Indonesia | Sep 2026 – Apr 2030

- **Academic Focus:** Software Engineering, Artificial Intelligence (AI), and Machine Learning (ML).

Vocational High School Diploma in Computer and Network Engineering (TKJ)

SMK Negeri 1 Seyegan

Sleman, Yogyakarta, Indonesia | Jul 2023 – Apr 2026

- **Technical Skills:** LAN Implementation, TCP/IP Networking, IP Addressing, Network Configuration and Troubleshooting, MikroTik RouterOS, Network Monitoring, Computer Hardware Maintenance, Linux, Kali Linux, and MySQL.
- **Competency Achievement:** Achieved a "Very Competent" rating in the national competency assessment for LAN Implementation.

TECHNICAL SKILLS

Programming Languages

Python **TypeScript** **JavaScript** **SQL** **Rust** **RouterOS Script**

Software and Frontend Development

React **React Native** **Expo** **Vite** **HTML5** **CSS3** **Tailwind CSS** **Bootstrap** **Chart.js**

Backend and API Development

Node.js **Express.js** **NestJS** **Fastify** **FastAPI** **Flask** **REST APIs** **OpenAPI/Swagger** **JWT Authentication**

Databases and Data Management

PostgreSQL **MySQL** **SQLite** **Prisma ORM** **SQLAlchemy** **Sequelize** **Redis**

Artificial Intelligence and Machine Learning

Google Gemini API **Generative AI Integration** **AI-Powered Applications** **Prompt Design** **Text Summarization** **Entity Extraction** **Machine Learning Fundamentals**

PROJECTS

1. Sentinel — Personal Cybersecurity Intelligence Platform

GitHub: https://github.com/budikusumafauzi-sketch/sentinel

Technologies: TypeScript, Rust, React Native, NestJS, Fastify, PostgreSQL, Redis

- Developing a multi-platform cybersecurity platform combining mobile, Windows desktop, and backend components for personal device security diagnostics.
- Designed a deterministic security scoring approach that separates rules-based evaluation from AI advisory guidance and incorporates threat intelligence for security analysis and remediation support.

2. StackLab — Full-Stack Developer Learning Platform

GitHub: https://github.com/budikusumafauzi-sketch/stacklab-v1

Technologies: React, TypeScript, Python, FastAPI, SQLAlchemy, SQLite

- Developed an interactive technical learning platform featuring SQL, JSON, API, Linux, and networking labs, with workspace management and activity tracking.
- Built a frontend and backend architecture supporting interactive technical exercises, database workflows, and API interactions.

3. Research and News Intelligence Center (RNIC)

GitHub: https://github.com/budikusumafauzi-sketch/research-news-intelligence-center

Technologies: Python, Flask, MySQL, Google Gemini API, Chart.js

- Developed an AI-powered dashboard that aggregates news and academic research metadata for topic monitoring, research discovery, and trend analysis.
- Integrated the Google Gemini API for automated summarization, key information extraction, and analytical insights.

4. Network Monitoring Dashboard

GitHub: https://github.com/budikusumafauzi-sketch/network-monitoring-dashboard

Technologies: React, Node.js, Express.js, MySQL, Sequelize, Docker

- Developed a full-stack network monitoring application for tracking device availability, latency, packet loss, and uptime through a visual dashboard.
- Implemented device management, authentication, alert generation, historical monitoring records, and data visualization.

5. Enterprise Network Lab using MikroTik CHR

GitHub: https://github.com/budikusumafauzi-sketch/enterprise-network-lab-mikrotik

Technologies: MikroTik CHR, Oracle VirtualBox, Network Routing and Security

- Developed a virtualized enterprise networking lab using MikroTik Cloud Hosted Router (CHR) on Oracle VirtualBox.
- Completed foundational networking, core network, security, and routing phases, with enterprise services and monitoring planned for subsequent development.

6. Enterprise Data Center Network Simulation

GitHub: https://github.com/budikusumafauzi-sketch/Enterprise-Data-Center-Network-Simulation

Technologies: Cisco Packet Tracer, Enterprise Network Design

- Designed a hierarchical enterprise data center topology incorporating core, distribution, access, WAN, server, and centralized monitoring layers.
- Modeled network segmentation, redundant connections, and infrastructure connectivity to demonstrate scalability and reliability.

ADDITIONAL SKILLS

Networking and IT Infrastructure

TCP/IP **LAN Implementation** **IP Addressing**

MikroTik RouterOS **Cisco Packet Tracer** **The Dude**

PRTG Network Monitor **Network Troubleshooting**

Computer Hardware Maintenance **Kali Linux**

Cybersecurity

OWASP Top 10 **STRIDE Threat Modeling**

Secure Authentication **SSRF Mitigation**

BOLA/IDOR Mitigation **Threat Intelligence**

Development Tools and Practices

Git **GitHub** **GitHub Actions** **Docker**

Docker Compose **Linux** **Automated Testing**

Technical Documentation **Turborepo** **pnpm**

CERTIFICATIONS

MikroTik Certified Network Associate (MTCNA)
MikroTik | Apr 2026

Computer Network Engineering Competency Certificate
LAN Implementation, “Very Competent” | SMK Negeri 1 Seyegan | Mar 2026

Google Cybersecurity Professional Certificate
Google / Coursera | Sep 2025

Google AI Essentials
Google / Coursera | Sep 2025

Intermediate Cybersecurity (108 Hours)
Digital Talent Scholarship, Fresh Graduate Academy | Oct 2025

Industrial Work Practice Certificate (4 Months)
Kominfo DIY / SMK Negeri 1 Seyegan | Nov 2025

TRAINING AND COURSES

Python Programming, SQL, Data Science, and AI Fundamentals
Dicoding Indonesia | Sep–Oct 2025

LANGUAGES

Indonesian
Native

English
Intermediate
